SUMMARY

Dynamic professional with 5+ years in education and 3 years in full-stack development, seeking impactful roles to leverage diverse expertise

EXPERIENCE

Software Developer

ClanConnect

📅 2022 - Present 📍 Okhla Phase 3, New Delhi

ClanConnect : Influencer marketing platform for Agency, Company & Brands.

- Developed and maintained various features of the ClanConnect platform, focusing on influencer marketing campaigns and user engagement.
- Revamped the existing platform from Ruby on Rails to Reactjs and Nodejs.
- Developed login, signup functionality using devise gem.
- Developed Signup referral logic, allowing users to receive discounts for successful referrals.
- Developed Admin Dashboard Module to monitor signed up users and campaigns activity, Added various additional feature for support team to manage users e.g. Block user, Manage Campaigns.
- Created intuitive user flows for both barter and paid campaigns, including negotiation processes. Managed user company and shipping address information to facilitate seamless transactions.
- Integrated SendGrid for email notifications, Twilio for messages, and Wati for WhatsApp notifications.
- Created multiple marketing templates in Wati and marketing email templates, as well as multiple offer discounts.
- Implemented validation checks across multiple sections of the web app to maintain data integrity.
- Created responsive pages to ensure compatibility across various devices and screen sizes.
- Enhanced application features to effectively fix bugs and optimise the overall performance, reliability and efficiency.
- Created Scripts to automate repetitive tasks.
- Participated in code reviews and provided constructive feedback to enhance code quality.
- Led deployments and provided training to junior developers on Git/GitHub, Ruby on Rails, and jQuery fundamentals.

ClanWorld: Platform for creating and viewing live streams.

- Developed contact us functionality and created few static web pages
- Fixed bugs in the application
